Supported Platforms Overview

This overview of supported platforms for Apparel and Footwear helps you to plan your implementation or upgrade projects, it applies to releases of SAP Business One 9.2 and higher.

Disclaimers

- AFS delivers support only for selected releases at its own discretion, based on the business impact and the complexity of implementation. This document is provided for reference purposes only and does not represent a binding current commitment. As this overview is an offline document, refer to the SAP Productivity Availability Matrix for the latest up-to-date support information.

- In general, only English language (regional settings) platform versions are supported. Platform versions in other languages are generally supported if there are no issues specific to the platform versions in the other languages.

AFS should run on every server-client platform (see Server / client Platforms below)

- **AFS is only tested on major versions of Microsoft operating systems, databases and Office software products.**

- The current document is version being used up to June 2021. If this specification is read after this date, please contact support to verify any changes that might have occurred

Server Platforms (Add on)

Server Platforms	9.2	9.3	10.0
Microsoft Windows Server 2008 R2 – 64 Bit (x64) (incl. Windows Terminal Services) – Standard & Enterprise Edition	X	X

Apparel HANA Apps and MPS

1. Server Platforms

Both HANA Apps and MPS require the same Server Platforms required for the Apparel addon. This is detailed in section **Server Platforms (Add on)**

2. SAP Client Versions

The Apparel addon must be installed and initialized in order to be able to use these solutions. Refer to **Client Platforms, Apparel and Footwear Add on- from AFS.43.60.2_9.3&10.zip** and **Apparel and Footwear OnCloud from AFS.43.60.2_9.3&10.zip**

3. Database Platform

The solutions do not work with SQL database server, they only work with HANA server. The supported HANA version are specified in section **Database Platforms (Add on)**

4. Framework

The UI5 framework required for the Hana Server is 1.65.13. Note that this is the current version being used up to May 2021. If this specification is read after this date, please contact support to verify the which is the supported one.

5. Web Explorers

Google Chrome	X
Firefox	X
Safari	X
Microsoft Edge	Not supported
Microsoft Explorer	Not supported
Opera	Not supported
Brave Browser	Not supported
