### UDF Creation Process for the PDM Console

The following steps describe the creation of UDF for the PDM console in Apparel and Footwear.

To create the UDFs on Apparel and Footwear please follow the steps:

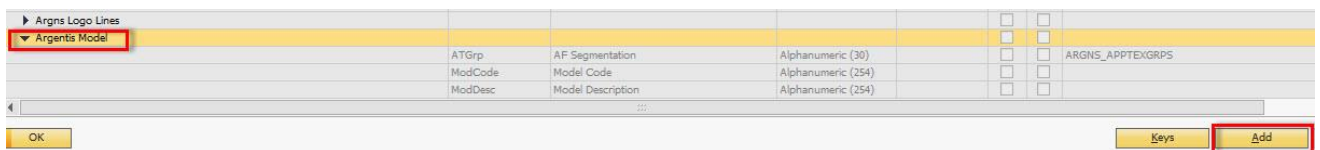

1. First, we need to create the UDF on the User Tables, to do this, on SAP, go to Tools → Customization Tools → User-Defined Fields – Management...

2. Look for the User Tables and open the content by clicking on the black arrow on the left of the text.

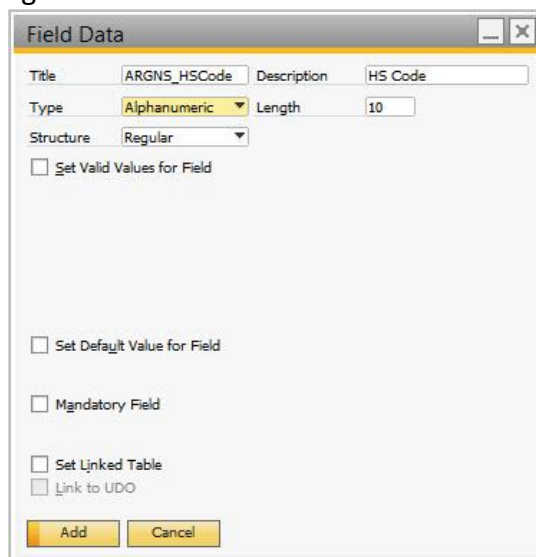

3. Look for the table called Argentis Model (this table is the one that we use to manage the Product Data Management console), select it by clicking over it and click on the "Add" button.

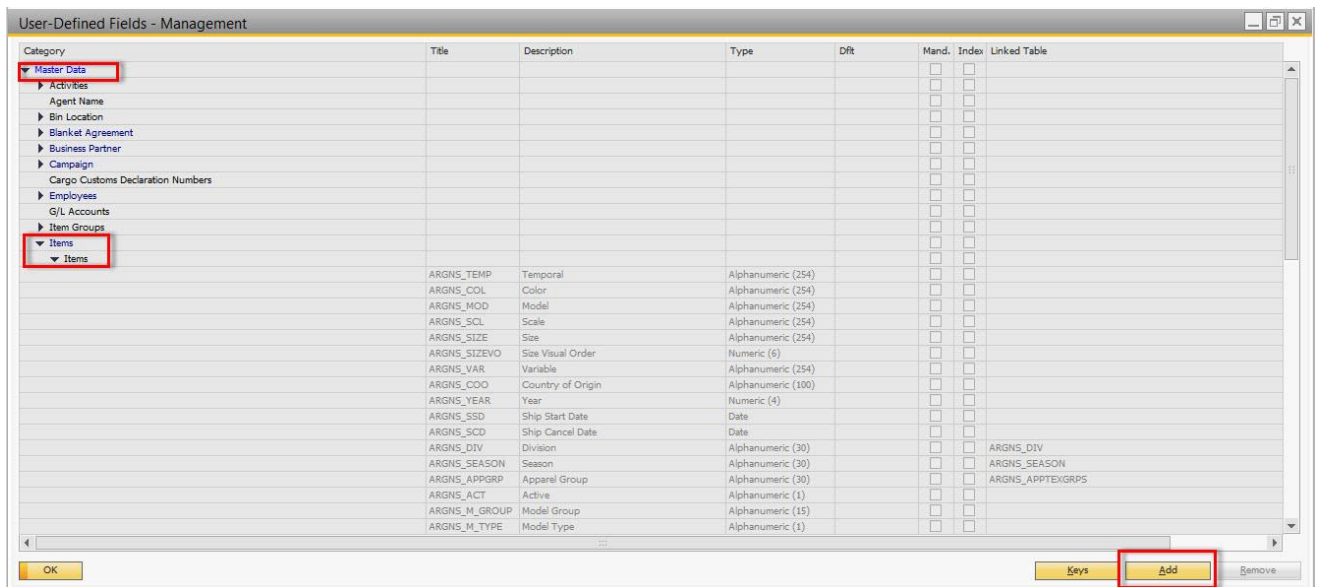

4. Complete the information requested according to the needs and select "Add" to create it.

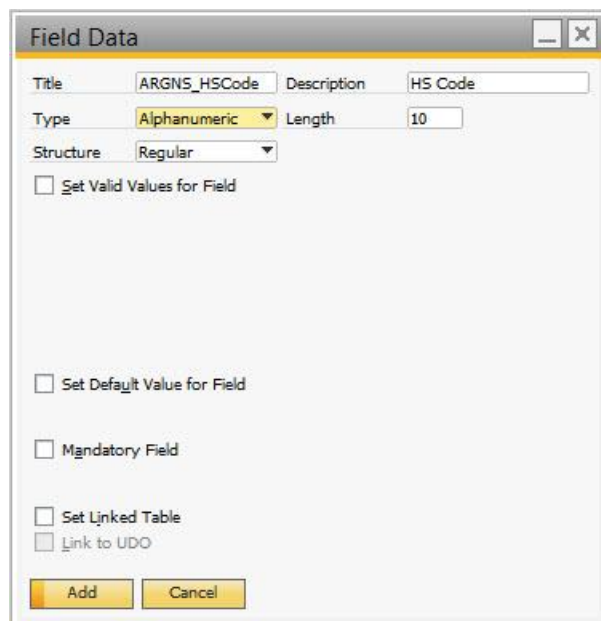

The UDF must begin with **ARGNS**

- Now, we must create the UDF on the Master Data tables, to do this look for the Master Data → Items → Items, select this last one, by clicking over it and select “Add”.

- Make the UDF exactly as the one created on the User Table. The UDF must begin with **ARGNS**

- If you go to the PDM Console on Apparel and Footwear and select the UDF tab you should now see the new created UDF.

The screenshot shows the SAP Product Master Data form. The 'HS Code' field is highlighted with a red box. The form includes various input fields for product details, a list of checkboxes for item types, and a bottom navigation bar with buttons like 'Find', 'Cancel', 'Copy From', 'Duplicate', 'Approve', 'Events and Activities', 'Create UPC Codes', and 'Generate SKUs'.

8. If you need to update on Item Master Data the UDF must has the check on OITM tab

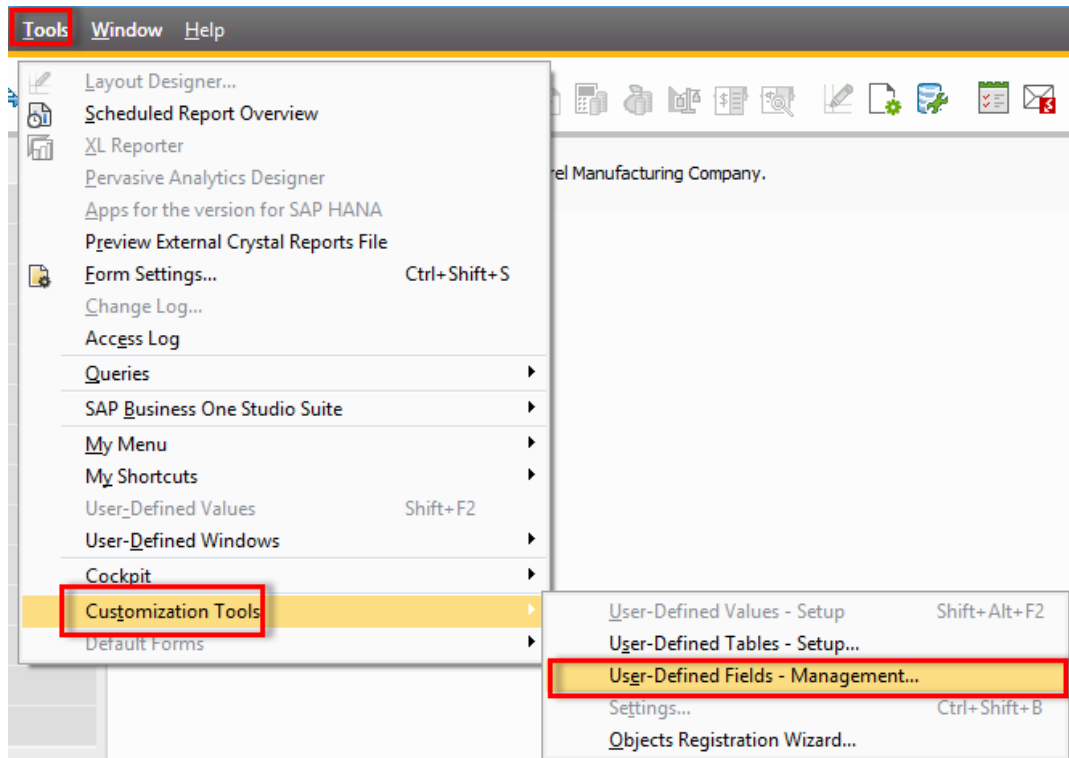

#	Description	UDF Filed	Updatable
1	Additional code for the item for eINV	U_B1SYS_MTXCode	<input checked="" type="checkbox"/>
2	Active	U_ARGNS_ACT	<input checked="" type="checkbox"/>
3	Available to Send Out	U_ARGNS_AvibToSO	<input checked="" type="checkbox"/>
4	Product Brand	U_ARGNS_Brand	<input checked="" type="checkbox"/>
5	Product Collection	U_ARGNS_Coll	<input checked="" type="checkbox"/>
6	Product Composition	U_ARGNS_Comp	<input checked="" type="checkbox"/>
7	Item Type	U_ARGNS_ITYPE	<input checked="" type="checkbox"/>
8	Product Line Code	U_ARGNS_LineCode	<input checked="" type="checkbox"/>
9	Model Group	U_ARGNS_M_GROUP	<input checked="" type="checkbox"/>
10	Model Type	U_ARGNS_M_TYPE	<input checked="" type="checkbox"/>
11	Operation	U_ARGNS_Operation	<input checked="" type="checkbox"/>
12	Package Type	U_ARGNS_PCKTYPE	<input checked="" type="checkbox"/>
13	Production Resource	U_ARGNS_ResCode	<input checked="" type="checkbox"/>
14	Raw Material	U_ARGNS_RMaterial	<input checked="" type="checkbox"/>
15	Standard Allowance Time	U_ARGNS_SAM	<input checked="" type="checkbox"/>
16	Seconds	U_ARGNS_SEC	<input checked="" type="checkbox"/>
17	Product Simbole Group	U_ARGNS_SimGrp	<input checked="" type="checkbox"/>
18	Product Sub Collection	U_ARGNS_SubColl	<input checked="" type="checkbox"/>

## UDF Options update Process for the PDM Console.

The following steps describe the creation of UDF for the PDM console in Apparel and Footwear.

To create the UDFs on Apparel and Footwear please follow the steps:

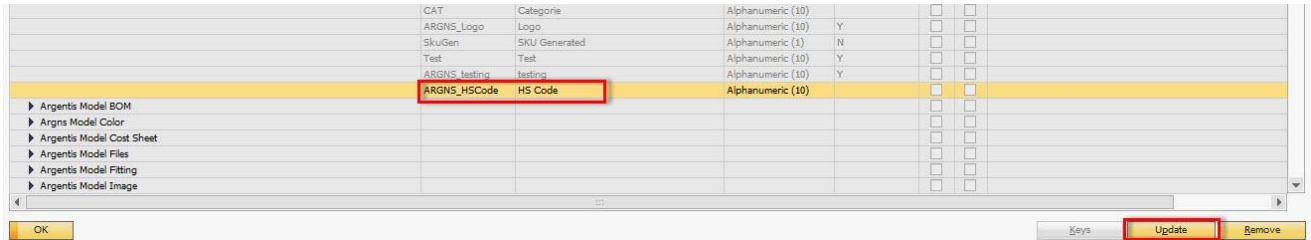

9. First we need to create the options on the UDF on the User Tables, to do this, on SAP, go to Tools → Customization Tools → User-Defined Fields – Management...

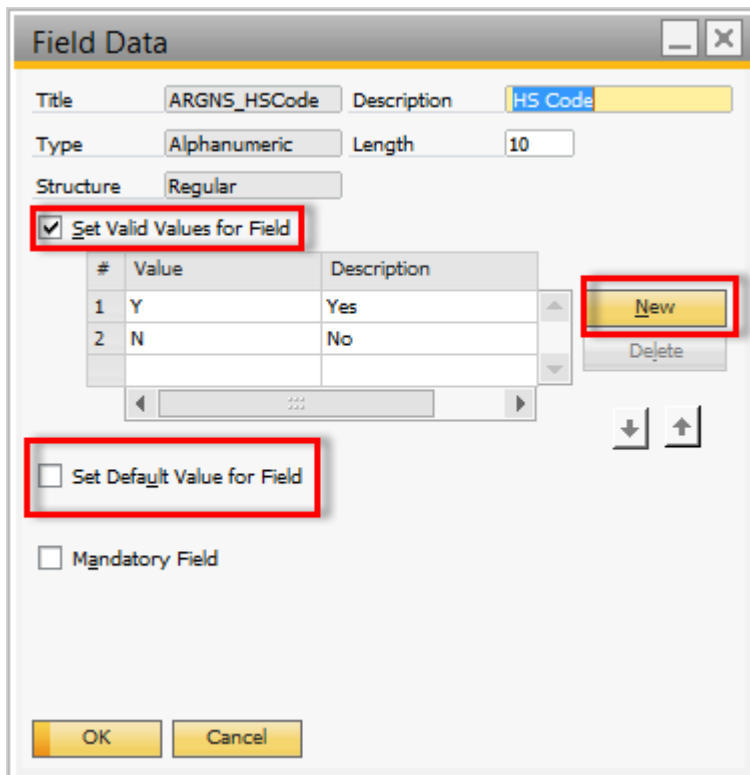

10. Look for the User Tables and open the content by clicking on the black arrow on the left of the text.

11. Look for the table called Argentis Model (this table is the one that we use to manage the Product Data Management console), look for the UDF field you want to add or modify options to, in my example, HS Code, select it by clicking over it and click on the “Update” button.

12. Make sure the “Set Valid Values for Field” and click on the “New” button for each option you want to add. You may check the “Set Default Value for Field” checkbox if you want a default value to appear when you open a model. Once finished click “OK” and accept the warnings you get.

13. If you open a PDM window on Apparel and Footwear you should now see the UDF with the new options.

## UDF Creacion

Los siguientes pasos describen la creación de UDF para la consola PDM en prendas de vestir y calzado. Para crear UDFs, siga los pasos:

1. Primero, necesitamos crear el UDF en las tablas de usuario, para hacer esto, en SAP:

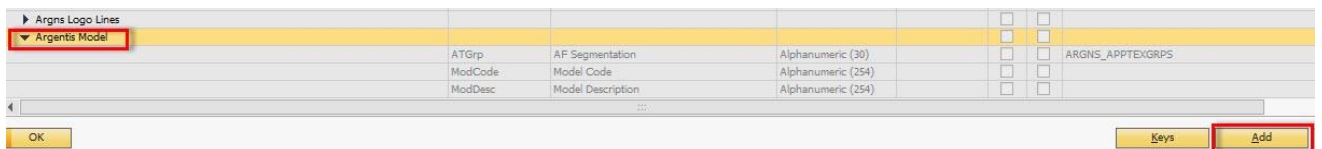

Tools → Customization Tools → User-Defined Fields – Management...

2. Busque las Tablas de usuario y abra el contenido haciendo clic en la flecha negra a la izquierda del texto

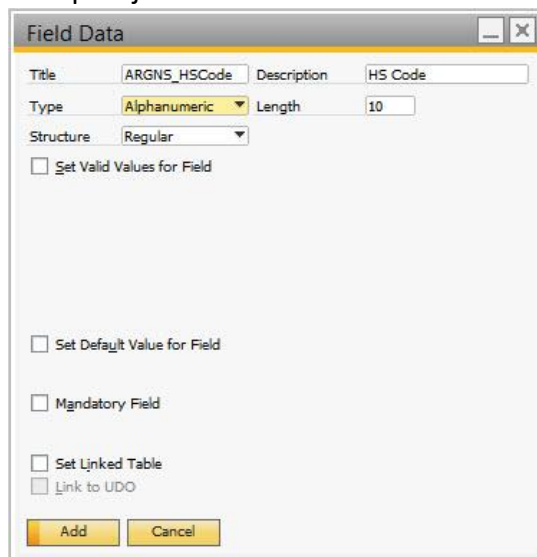

3. Busque la tabla Argentis Model, en User Tables, selecciónela y luego haga click en el botón "Add"

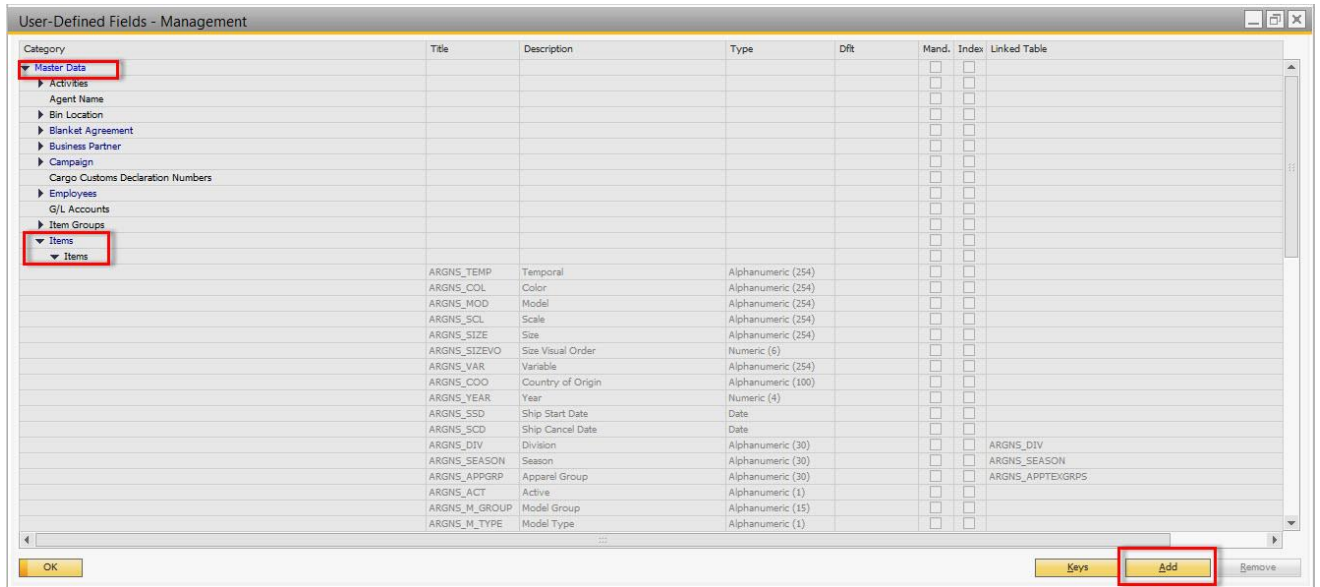

4. Complete la información requerida y seleccione "Add" para crearlo.

El UDF debe tener el prefijo **ARGNS**

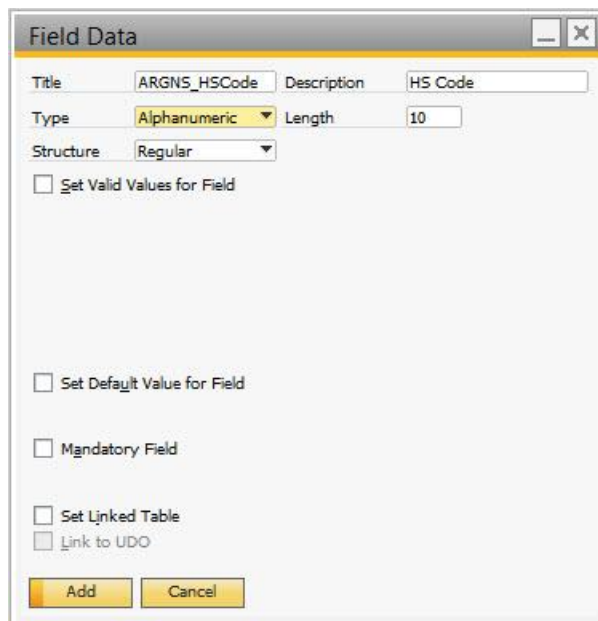

5. Luego se debe crear el UDF en Master Data tables:

Master Data → Items → Items, selecciónelo y haga click en el botón "Add".

6. Debe crear el UDF exactamente como lo creo anteriormente, en User Table.

7. Si va a la consola de PDM y selecciona la pestaña UDF, ahora debería ver el nuevo UDF creado

The screenshot shows the 'Product' configuration window in SAP. The 'HS Code' field is highlighted with a red box. The window contains various input fields for product details, a list of item types on the right, and a bottom navigation bar with buttons like 'Find', 'Copy From', 'Duplicate', 'Approve', and 'Generate SKUs'.

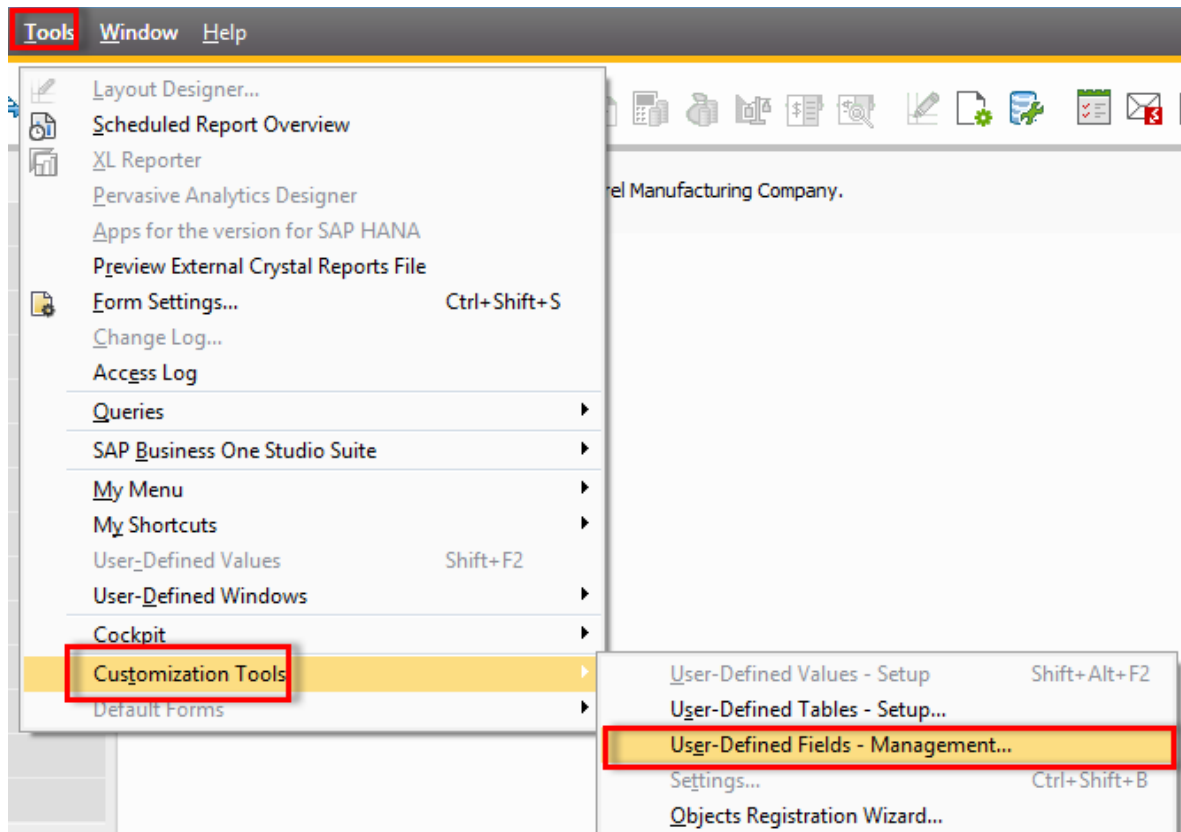

1. Si necesita que el valor de el UDF se actualice en Item Master Data (OITM) debe estar seteado como se muestra a continuación:

#	Description	UDF Filed	Updatable
1	Additional code for the item for eINV	U_BISYS_MTXCode	<input checked="" type="checkbox"/>
2	Active	U_ARGNS_ACT	<input checked="" type="checkbox"/>
3	Available to Send Out	U_ARGNS_AvibToSO	<input checked="" type="checkbox"/>
4	Product Brand	U_ARGNS_Brand	<input checked="" type="checkbox"/>
5	Product Collection	U_ARGNS_Coll	<input checked="" type="checkbox"/>
6	Product Composition	U_ARGNS_Comp	<input checked="" type="checkbox"/>
7	Item Type	U_ARGNS_ITYPE	<input checked="" type="checkbox"/>
8	Product Line Code	U_ARGNS_LineCode	<input checked="" type="checkbox"/>
9	Model Group	U_ARGNS_M_GROUP	<input checked="" type="checkbox"/>
10	Model Type	U_ARGNS_M_TYPE	<input checked="" type="checkbox"/>
11	Operation	U_ARGNS_Operation	<input checked="" type="checkbox"/>
12	Package Type	U_ARGNS_PCKTYPE	<input checked="" type="checkbox"/>
13	Production Resource	U_ARGNS_ResCode	<input checked="" type="checkbox"/>
14	Raw Material	U_ARGNS_RMaterial	<input checked="" type="checkbox"/>
15	Standard Allowance Time	U_ARGNS_SAM	<input checked="" type="checkbox"/>
16	Seconds	U_ARGNS_SEC	<input checked="" type="checkbox"/>
17	Product Symbols Group	U_ARGNS_SimGrp	<input checked="" type="checkbox"/>
18	Product Sub Collection	U_ARGNS_SubColl	<input checked="" type="checkbox"/>

## UDF Actualización

Los siguientes pasos describen la creación de UDFs en Apparel & Footwear.

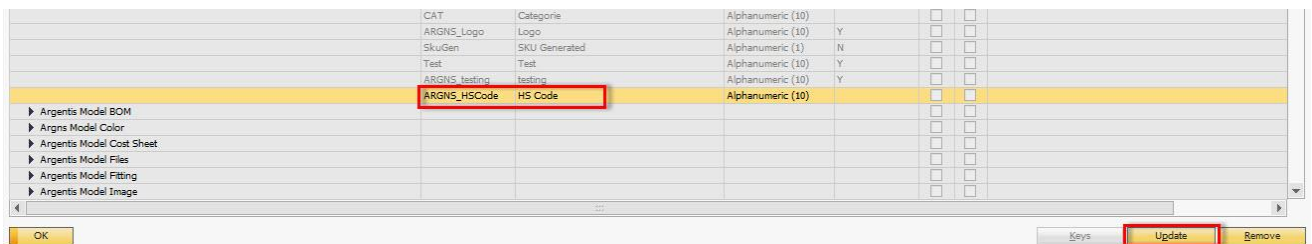

2. First we need to create the options on the UDF on the User Tables, to do this, on SAP, go to Tools → Customization Tools → User-Defined Fields – Management...

3. Look for the User Tables and open the content by clicking on the black arrow on the left of the text.

4. Look for the table called Argentis Model (this table is the one that we use to manage the Product Data Management console), look for the UDF field you want to add or modify options to, in my example, HS Code, select it by clicking over it and click on the "Update" button.

5. Make sure the "Set Valid Values for Field" and click on the "New" button for each option you want to add. You may check the "Set Default Value for Field" checkbox if you want a default value to appear when you open a model. Once finished click "OK" and accept the warnings you get.

**Field Data**

Title: ARGNS\_HSCode Description: HS Code

Type: Alphanumeric Length: 10

Structure: Regular

Set Valid Values for Field

#	Value	Description
1	Y	Yes
2	N	No

Set Default Value for Field

Mandatory Field

Buttons: OK, Cancel, New, Delete, Up, Down

6. If you open a PDM window on Apparel and Footwear you should now see the UDF with the new options.

**Product**

Doc. Numbering, Code, Description, MBI Code, Status, Product Line, Product Group, AF Segmentation, SAP Item Group, Season, Collection, Sub-Collections, Composition, Symbols Group, Brand

Designer, Division, Year, Owner, Country of Origin, Ship Start Date, Ship Cancel Date, Customer, Vendor

Main Warehouse, Secondary Warehouses, Price List, Currency, Price: 0.00

Inventory Item, Sales Item, Purchased Item, Fixed Assets, Active, Raw Material, Embroidery-Engraving

Scale, Color / Material, Variable, WorkFlow, Prepacks, Design and Concepts, POM, Constructions Details, Logos, Cost Sheet, OP instructions, Comments, Stock

Logo: Yes, testing: Yes

**HS Code:** Y - Yes, N - No

Buttons: Find, Cancel, Copy From, Duplicate, Approve, Events and Activities, Create UPC Codes, Generate SKUs, Preview Files

NOTA: para algunas tablas como ARGNS\_MODEL\_COLOR, la longitud máxima permitida es de 10 dígitos, es decir: ARGNS\_ABDC
